

Age 11-13 Year-Round Schedule

The following chart outlines a year-round schedule. Simply fill in the dates on the left. Each semester contains approximately 80 days of instruction, and each unit lasts between 3-4 weeks. It is important that the units be taught in the recommended sequence so that connections can be drawn among the subjects. The units also get progressively more challenging as the year moves on. We have left a few weeks of flexibility over the school year so that you can spend more time studying topics your child wants to explore in more depth. The time could include field trips and educational family vacations. This flexibility also leaves time for re-teaching skills your child may need to practice or spending extra time on final projects. Remember to schedule extra days for holidays and family breaks.

| <u>DATE</u> | <u>UNIT</u> |
|----------------------|---|
| Semester One: | |
| | Unit 1: The Pearl (LA) Egypt and Mesopotamia (SS) The Hydrosphere (S) |
| | Unit 2: A Girl Named Disaster (LA) Africa Today (SS) The Atmosphere (S) |
